Project

EduTrack– Student Management System

Developed a full-stack Student Management System with secure role-based authentication for Admin, Faculty, and Students. Implemented modules for attendance, marks, timetable, department management, notifications, and student profiles. Built using **React.js**, **Node.js**, **Express.js**, **PostgreSQL**, **Prisma ORM**, **JWT Authentication**, and **Tailwind CSS**

E-Commerce Platform

Developed a scalable full-stack e-commerce platform with dynamic product and inventory management. Implemented secure payment gateway integration and RESTful APIs for cart, order, and user management. Enhanced user experience with responsive design, authentication, and efficient database operations.

Technical skills

Python

Flutter

Front-end Devolepment

Embedded Stystems

Certifications

Internet of things- NPTEL

Python fullstack- Eduskills

HTML/CSS- Infosys springboard

Electric components-Eduskills
